

Wizard's Cutting Light

Model 7013

Auto-Registering Rotary Laminator
& Laser Cutting Machine

Powered by:

The Sohn Wizard Light is an auto-registering laminating and laser cutting machine. Designed to take preprinted roll material, laminate the material, then laser die cut in register with the printed material. The Wizard Light Model 7013 operates with 70 watt focus laser beam that is directed to cut, kiss cut, perforate, score and etch pattern into material as specified in a customer's vector file.
